Greetings Dover City Council Members,

My name is Nicole Hentz, I live on Hough Street in Dover, and I wanted to write in and let you know that I fully and enthusiastically support the establishment of Indigenous People's Day on the second Monday in October.

We have long lived off the land that was in many cases violently taken from Indigenous people, and on my many trips to the Woodman Institute, I've learned about Dover's own record of violence. While establishing a day does not make up for past aggressions, I feel like it is a step towards acknowledging our violent past so that we can live in a city I love based on truth and reconciliation.

Thank you for serving,

Nicole Hentz
