

Dover Public School District - Assessment of COVID-19 Metrics

	HIGH / CRITICAL RISK	MEDIUM / IMMINENT RISK	LOWEST RISK
Hospital capacity (ICU headroom used)	High or critical risk (60-100%)	Medium risk (50-60%) 58% of ICU beds in use (↓)	Low risk (0-50%)
New cases per day per 100,000 population (7 day avg)	High or critical case load (25+ per 100k) NH: 29.6 per 100k (↑) Strafford: 36.4 per 100k (↑)	Medium case load (10 - <25 per 100k)	Low case load (<10 per 100k)
Transmission rate	High risk (Rt >= 1.20)	Medium risk (1.00 < Rt < 1.20) NH: Rt = 1.12 (↔) Strafford: Rt = 1.14 (↓)	Low risk (Rt <= 1.00)
Testing availability	Difficult to get symptomatic testing; little to no asymptomatic testing	Symptomatic testing widely available; asymptomatic testing available for exposed	Symptomatic and asymptomatic testing widely available
Percent of tests that are positive (7 day avg)	High risk (> 10%)	Medium risk (3-10% positive) NH: 4.9% (↑) Strafford: 8.5% (↑)	Low risk (< 3% positive)
Time to test results	More than 48 hours	< 48 hours	<24 hours

Our “new normal” can occur when there is a safe and effective vaccine, rapid and frequent surveillance testing, and/or effective treatment reducing the risk of mortality and morbidity to levels comparable to other common viruses.
