

NHSBA resolution submission July 2023

V:U - NHSBA affirms the fitness of school librarians to research and select appropriate digital and printed material for school libraries. Recognizing that marginalized groups have been historically underrepresented in school libraries, literary collections should offer students information that provides a balance of ethnic, political, religious and cultural values. Further, library material should represent diverse points of view, provide a global perspective, stimulate critical thinking skills, and meet the interests, abilities, learning styles, and information needs of the learning community.
