Description	Price	Qty	Ext. Price
Installation Ockers to provide and install a sound system for the new athletic complex at Dover HS. System includes (4) JBL 15" Outdoor speakers. All speakers will be mounted at the press box, and correctly positioned to evenly distribute sound to all necessary areas of the football field. (Baseball field is currently out of scope, but system can be expanded) 2 of the speakers will be positioned for the home side bleachers and tuned/configured for appropriate volume levels for home crowd bleachers. The other 2 speakers will be configured/positioned for the bleachers on the away side of the field. Their positioning will not cause them to be overbearing for the home side bleachers, but will provide excellent clarity for the away side. Speakers will be powered by a Crown amplifier. A Soundcraft 12 channel rack mount mixer will tie everything together, and has room for expansion. A single Shure wired Microphone on a table top stand is included for the announcer, and will be connected directly into the mixer. A Shure 2 channel wireless microphone system is included as well. This system contains a wireless handheld mic and a bodypack with lavalier mic, as well as an external antenna system to allow for extended pick up range throughout the football field. A dual gang surface mount wall plate with RDL audio inputs will be installed in the press box to connect in additional devices. This includes stereo RCA inputs, an XLR Mic input, and a Bluetooth connection. Equipment will be housed in a 24U pivoting wall rack, installed in the press box. This includes a 3RU drawer, with a keylock, to store microphones and other equipment. All necessary cabling and connectors are included for a full turnkey installation. Ockers assumes all necessary power is in place, and work will be completed during regular business hours.
