Bleiler, C.F.

Well, we finally hit the big time. Dover has become the prime example of pension abuse and scamming nation wide. If you haven't read it already I would suggest you council members read the February 21 edition of USA Today. If you have difficulty finding the article put in the word Fenniman and it will pop up.

Our esteemed ex chief was selected as the number one example of fleecing of a community within a broken pension system. The Union Leader referred to his ability to feather his own nest at the expense of Dover taxpayers as "Gaming the system". The Union leader was referring to both Fenniman and Harrington. I wonder why Dover keeps as a consultant the person that was the architect of this excess spending.

Many months ago I came before this council and predicted a large unfunded liability reaching perhaps 15 million. I apologize to the council for making a serious mistake. Our unfunded liability is much more than I predicted. The health care liability by itself, according to an Actuarial group Alliance Benefit group is over \$32 million and growing. Daily. I applaud Councilor Cheney for putting in the resolution requesting this study.

It is my suggestion since we are facing such an enormous benefit liability that the city council must reconsider their vote for the 18 million dollar capital expenditure program for this year which now becomes 21 million with the additional funds to complete the Woodman park school improvements.

If this is not done the taxpayers of Dover face the largest single increase of taxes in the history of the city.

Let your conscience be your guide and your sense of responsibility to your neighbors and in particular the elderly residents who built this town and who are being run out of this town with the confiscatory taxes that follow your excess spending.
