I wanted to let everyone know that there was an email passed around this summer stating that basements seem to be dry and it looks like the pumping is helping. I responded with you need to wait until the rains come because you are making an assumption during a drought time period. Well sure enough the rains came in the last 2 weeks and my basement (on Shawnee Ln) is now flooded to the normal static level that it has been at for the last 7 years since Home Depot went it. The issue in the town is far greater than where the level of the pond is. It takes years for the water table to recede and the pumping needs to continue as well as some diversions being piped in under the ground in neighborhoods with flood problems. The issue needs to really be addressed on a City wide level and needs to be corrected so that in the spring we are not all going to be expecting that basements are not going to flood. I have a sump pump working 24 hours to keep up with the water that has come in. As long as we don't have another all out rain storm then it should clear up in the next few weeks.

I just wanted to make it clear that the pumping has not solved the problem and I hope that the city is still looking at this and trying to trouble shoot it so that home values don't continue to plummet. On that note I filed for an abatement of taxes for a readjustment of property value 2 years ago when they basically told me to take a hike. I think this is a serious issue and if it is not going to be fixed taxes need to be adjusted for those of us with decreasing home values due to the flooding and also all the money on a yearly basis that I need to put into my home to fix it every time the water causes me to spend money on extra pumps and cleaning and then all the time that goes into this also. The city has put us into this mess and it would be nice to have some assistance from them where I pay all may tax dollars to.

Subject: RE: Willand Pond: Water Level

Hi All,

Looks like Dave was able to take a water level measurement yesterday...see below.

Thanks,

Sally

Subject: Willand Pond

Hi Sally,

I checked and the ice is out so I took a measurement today. We are up and running again!

Willand Pond water level 12/13/2010 – 189.44

Thanks,

Dave

Subject: Willand Pond

Hi Sally,

I didn't take a water level today as Willand pond is completely iced in. With over 1 ¼ inches of ice along the shoreline this may be it.

Thanks,

Dave

Subject: RE: Willand Pond: Water Level

Hi All,

Correction on the Willand Pond water level it is:

Willand Pond water level 9/14/2010 – 189.87

(Not 189.07 as previously reported.)

Thanks,

Sally

Subject: RE: Willand Pond: Water Level

Hi All,

Dave Sharples was out of the office last Friday. The water level reading was taken today:

Willand Pond water level 9/14/2010 – 189.07

Reminder...if you've been keeping a log of water levels in your basement or have any anecdotal information you'd like to share about basement water levels you can send me an e-mail or mail a hard copy.

Thanks,

Sally

Willand Pond water level 9/3/2010 – 190.44

REMINDER: If you have been keeping a log of water levels in your basement, we're looking to collect the logs in early September so please do one of the following: 1.) Bring your log to the Friends of Willand Pond meeting on 9/8, 6:00 PM, at the McConnell Center; 2) Give your log to Cherie Bartlett; or 3) mail your log to me at the address below.

Also, Cherie: could you collect logs from your neighbors who aren't on the e-mail list & bring the logs with you to the Friends meeting on 9/8?

Thanks!

Subject: Willand Pond: Weekly water level & Cub Scout clean-up update

Hi Everyone,

I'll be sending out details early next week about the pond clean-up the Dover cub scouts will be doing on April 24th. The clean-up is tentatively scheduled for 2:00 – 5:00 PM on the 24th. The scouts will start at the boat launch & will work their way around the shore behind the apartments & then will go out into the park/trails area to help clear brush from the trails. I will send out an e-mail on Monday to confirm the time & clean-up plan. I hope some of the Friends will stop by and visit with the scouts.

Also, here is the weekly Willand Pond water level from Dave Sharples:

Willand Pond water level on 4/16/2010 – 194.19

Thanks,

Sally

Subject: Willand Pond

I took the water elevation today and it is 194.28.

I checked the road to the rear parking area and the lowest part of the crown of the road is 25 inches underwater and the edge of the road is about 30 inches underwater. The water will need to drop a minimum of 30 inches before the pavement is fully exposed.

Previous Water Level Information from Dave:

3/12/2010 – 192.79

3/19/2010 – 193.45 (this is the highest water level that I've recorded. Previous recorded high was 193.1 back in May 2007)

How the Levels are Recorded:

Where: I have set several nails in dead standing timber at the water level the day they were set. I then shot the elevation of the water level to determine the elevation of the nails.

How: Now I can just measure up or down from a nail with a ruler to determine the water level on any given day. I set several of them so I can be reasonably sure that they have not been tampered with since they should all be the same distance from the surface. I also go out periodically and survey the water level and the nails to make sure they haven't been altered. I did this last Friday and will probably do it once a month or if I feel the nails have been disturbed. I did install a primitive gauge with a ruler on it but, as expected, got taken within a few weeks.

When: Once a week on Fridays.

Subject: Friends of Willand Pond - April 15th Meeting Minutes

Hello Friends!

Attached you will find the minutes from our meeting last night! I will be sending another email to you all soon to get your input on changing the date for the "Day at the Pond" celebration, and to have your review the draft task list for the event.
