Main St. Traffic Petition

We the undersigned respectively request that the City of Dover revert to the "Old" traffic pattern on Main Street, which would remove the added 5 parking spaces and to return the Right Hand Turn Lane onto Chaple St. We attest to the fact that this traffic pattern change has created dangerous safety conditions to both vehicles and pedestrians. There has been an increase of accidents in the area and numerous near misses. This change has also created an excessive back up of traffic often down to the area in front of Smileys. This bottleneck should immediately be taken care of before someone is either killed or dangerously hurt.
