Harriman Recommendations:

Based on Harriman's review of the survey proposals received, we recommend Titcomb as the lowest qualified proposal.

Wetland delineation has not been included because the timing of wetland delineation could possibly delayed the survey. We recommend negotiating with the lowest surveyor to coordinate the wetlands delineation in the spring. We would request a written quote for the surveyor to provide a Certified Wetlands Scientist, report on findings and record wetlands on the site plan. At the same time the surveyor can verify ground conditions once the snow has melted.
