Schluter®-DILEX-AHK/-PHK

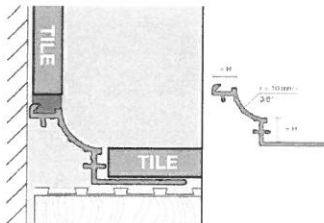

Application and Function

Schluter®-DILEX-AHK/-PHK features a single trapezoid-perforated anchoring leg, which is secured in the mortar bond coat and a cove section that forms the visible surface.

The profile's 3/8" (10 mm) radius makes DILEX-AHK/-PHK an attractive option for countertop/backsplash transitions, as it prevents the accumulation of dirt and makes cleaning simple. The profile separates tile fields that meet at inside corners where limited movement is expected.

Schluter-DILEX-AHK/-PHK prevents surface water penetration and meets the maintenance and hygienic requirements of commercial kitchens, bathrooms, and food-processing plants, or any tiled environment where a sanitary cove base is desired.

Schluter-DILEX-AHK is available in anodized aluminum and Tuscan color-coated aluminum, while Schluter-DILEX-PHK is made of rigid PVC with a pre-colored, rigid PVC cove section. Accessories for Schluter-DILEX-AHK/-PHK include: inside and outside corners, connectors, and end caps.
