

DID YOU KNOW THAT GRASS FIELDS CAN TAKE MORE

- ✓ ☐ Grass fields **CAN** be 100% rain-out proof
- ✓ ☐ Grass fields **CAN** sustain unlimited use
- ✓ ☐ Grass fields **CAN** be inexpensive and easy to maintain

#GRASSCANTAKEMORE®

WHAT IS #GRASSCANTAKEMORE® ?

Historical perception has been that natural grass surfaces can sustain only limited use, require long closure periods for repairs, and are expensive and difficult to maintain. That perception is no longer reality. Using The Proven System, GRASS FIELDS **CAN TAKE MORE!**

THE PROVEN SYSTEM

With evolving maintenance, new technology, and objective data from Natural Grass Performance Analytics™, the Proven #GrassCanTakeMore® System pieces together the most important elements of natural grass field maintenance to deliver stronger, safer and more affordable playing fields.

THE SYSTEM IN ACTION

ST. PAUL'S SCHOOL FOR GIRLS

BROOKLANDVILLE, MARYLAND

Prior to implementing the #GrassCanTakeMore® System, St. Paul's School for Girls was searching for a solution to keep up with the ever increasing demand for field usage and need for rental revenue. The school wanted to reduce the amount of rainouts and increase the amount of play. Most importantly, they wanted to provide a high quality, attractive, natural grass playing field for their student athletes.

BEFORE

PROPER WATER MANAGEMENT
only when needed to support deep roots, consistent microbial life and to reduce rain cancellations from wet fields

EASIER MOWING utilizing proper field mowing equipment to increase density and durability

IMPACTFUL AERATION
using equipment to relieve compaction to support healthy roots, increase soil respiration, and reduce puddles

NATURAL GRASS PERFORMANCE ANALYTICS™ to make data-based decisions and guide maintenance to specific areas in need

EFFICIENT PLANT FEEDING
based off soil testing and focused primarily on making the grass healthy and durable

SUPERIOR GRASS SELECTIONS
created for high use, while requiring less fertilizer, water and pesticide

THE PROVEN RESULTS

- ✓ Reduced rainouts even during a wet spring
- ✓ Excellent field quality even with nearly unlimited play
- ✓ Fewer hours per month needed for routine maintenance
- ✓ Significant reduction on field repair costs
- ✓ Increased revenue from non-school event rentals

WHAT IS NGAG™?

EDUCATION | ADVISORY | MANAGEMENT | ANALYTICS

Natural Grass Advisory Group™ (NGAG™) is an independent advisory and support team focused on the improvement of natural grass sport surfaces. NGAG™ was founded with a single mission:

Establish that Grass Fields CAN Take More!

Natural Grass Advisory Group™ provides clients with real-life solutions to meet the challenge of maintaining quality, high-use natural grass fields. From staff training and maintenance planning, to virtual field management and renovation/construction oversight, NGAG™ solutions are always budget conscious and environmentally responsible. Natural Grass Advisory Group™ applies positive thinking and creativity. From parks and schools to professional grounds and stadiums. For field managers and executives to coaches, players and parents.
