Behavior	Grade Book	Scheduler
Calendar	Health	Special Education
Census	Locker Management	State Reporting
Course Management	Messenger	Survey
Course Registration	Mobile Portal	Transportation
Data Analysis	Multi-year Academic Planner	

Ad Hoc Reporting

Use the data managed within Infinite Campus to define, filter, format, and deliver information required for instruction, accountability, communication, and other essential business processes. An intuitive wizard-style query interface and report editor find patterns within data to determine answers to critical questions and make informed decisions.

Included In
DE

Assessments: Test Score Import

Capture a variety of test scores including teacher-scored, school- and district-collected, and state or national test scores in Infinite Campus to gauge an assessment of learning. Infinite Campus allows an unlimited amount of summative and interim test data to be used as an indicator of student growth, to inform instruction and to comply with state and federal reporting.

Included In
DE

Assignment Management

Teachers can create and manage both activities and assignments, using a single interface, and score assignments without opening the grade book.

Included In
DE

Attendance

Infinite Campus understands the importance of an easy-to-use attendance module, providing schools and districts with an efficient way to manage attendance while keeping parents aware of their student's status. Infinite Campus provides functionality for the collection, reporting and communication of attendance.

Included In
DE

Behavior

Campus Behavior tracks and reports information about specific student behavioral events, positive or negative, that occur during school or at offsite events. Tracking is incident-based and its built-in workflows keep appropriate staff informed.

Included In
DE

Calendar

Vital information housed in the calendar, including school days, grade levels, and schedule structures, act as building blocks shaping how information is tied together throughout Infinite Campus. Significantly decrease annual data entry by rolling forward multiple calendars, one calendar, and/or specified attributes.

Included In
DE

Census

Campus Census is designed to track every member of your Infinite Campus learning community with complete historical data maintained in perpetuity, if preferred, with even the most complex family structures clearly represented.

Included In
DE

Course Management

Improve efficiencies with a tiered-course system, helping you stay organized by tying essential elements such as assessments, standards and grading tasks to each course. Feel confident knowing each school has the same number and naming convention for courses and grading, with options to lock information tied to a course master.

Included In
DE

Data Analysis

Give authorized users the ability to independently perform “big picture” analysis without burdening your technology support staff with Campus Data Analysis. Data displays in a user friendly way allowing the user to sort, count, and total the data with drill through ability to view the underlying detail.

Included In
DE

Document Management

The new Infinite Campus Document Management system gives districts the ability to attach documents associated with a student's record within the Campus student information system (SIS), rather than a stand-alone system. Document Management uses the Campus Digital Repository (CDR) framework for storing documents, in the cloud, from tools within the Campus application associated to any student (or person) within the Campus SIS. This provides a cumulative file storage and retrieval for documents associated with registration, non-electronic testing records, athletics, transcripts, etc. and works seamlessly with the Campus SIS. Current and historical documents are now easy to track and maintain, increasing district staff productivity and efficiency.

Included In
DE

eTranscript

Create staff efficiencies and eliminate costs associated with paper-based processing including the cost of paper, mailing, and copying. Requested electronic transcripts can be transmitted using PESC XML messaging through the included Docufide Sender and your school's PESC-compliant processing partner using an XML-generated file.

Included In
DE

Fees

Campus Fees gives districts flexibility when managing costs associated with students, parents and staff for current, past due, and future fees. Creating fee assignments, making payments, voiding transactions, making adjustments and adding comments is easy via the improved user interface.

Included In
DE

Filters

Create and share filters from fields, including custom fields, stored in Infinite Campus based on selection from a list, specific database field combinations, and SQL pass-through queries.

Included In
DE

Free and Reduced Application Management (FRAM)

Campus Free and Reduced Application Management (FRAM) is included with Infinite Campus. Get immediate results when processing applications, giving students a free, reduced or paid meal status while ensuring data confidentiality in the cafeteria.

Included In
DE

Grade Book

Campus Grade Book Open Beta facilitates the easy-entry of student scores and analysis of student performance. Teachers take grading to the next level with student sorting, graphs, configurable calculations and color-coding based on student performance. Scores and grades are made available immediately to students, staff and parents via the Campus Portal.

Included In
DE

Health

Campus Health provides the tools needed to successfully manage a student's health visit, maintain immunization information and distribute medications. Health professionals can schedule student treatments and medication visits while also providing and documenting care for student walk-in visits.

Included In
DE

Locker Management

Managing lockers is a time-consuming task which takes valuable time away from other critical activities at your busiest time of year. Streamline the creation, assignment and management of lockers using Infinite Campus.

Included In
DE

Messenger

Campus Messenger is included with the Infinite Campus District Edition (ICDE) core product and available to all districts. Simplify your process of communication with staff, students and parents via email delivery. This standard tool allows you to build, design and send emails with intuitive wizards and templates.

Included In
DE

Mobile Portal

Anytime, anywhere access. Get your Campus Portal information when you want it from your iOS or Android devices.

Included In
DE

MS SQL Customized Reporting

Provide access to data using Microsoft SQL Reporting Services (SRS) in addition to the built-in, Ad Hoc and third-party reports already available within Campus. Create customized reports using any Campus data element to meet specific district- or school-defined requirements.

Included In
DE

Multi-Year Academic Planner

Prepare students for success with their own graduation plan. Multi-year Academic Planner gives you the ability to define a group of courses which meet graduation program requirements.

Included In
DE

National Records Exchange

The Campus National Records Exchange (NRE) allows participating Infinite Campus districts to exchange student records, regardless of physical location. When a district registers and "joins" the Infinite Campus NRE network, it can request detailed student data from a student's former district and reduce manual data entry. This feature is part of the core product, at no additional cost.

Included In
DE

Online Assessments

With Campus Online Assessments teachers can create test items, deliver assessments, auto-score them and generate reports on student performance without purchasing a separate LMS.

Included In
DE

Online Assignments

Teachers have a simple and effective way of providing attractively-formatted assignments to students. An editing tool allows the student to respond to the assignment. The teacher is then able to view each student’s response within the Assignment tool and provide feedback. Finally, the student and parents are able to view the teacher’s evaluation – all via the Campus Portal.

Included In
DE

Online Course Registration (Portal)

Course Registration is part of the scheduling process. For maximum convenience in course selection, students can register for courses online via the Campus Portal.

Included In
DE

Portal

Students and parents have real-time access to their information as it is entered by teachers, counselors, and staff. It is also accessible from any Apple iOS and Android device. Parents and students can utilize the course registration wizard to submit course requests and school choice requests.

Included In
DE

Response to Intervention (RTI)

The Infinite Campus Response to Intervention (RTI) tool offers a simple and powerful resource for delivering individualized learning to students in need. With Campus RTI, districts can create, deliver and monitor student intervention plans directly within the core Infinite Campus interface. This integration ensures that district staff have instant access to relevant, accurate and real-time intervention information.

Included In
DE

Scheduler

Benefit from course and staff planning tools, building tools, loading options and mass update tools. Enjoy significant performance enhancements allowing you to build and load with unprecedented speed. Auto-build on parameters you set using automatic tools and immediately compare scheduling numbers from previous years with multiple scenarios for the upcoming one to optimize the coincidence of time, space, people and resources in your school as never before possible.

Included In
DE

Special Education

Avoid paperwork burnout, spend more time collaborating, and provide personalized learning for your students using Campus Special Education. Infinite Campus tools, documents and forms store due-process events, historical records, and reported data in one product.

Included In
DE

State Reporting

Infinite Campus helps maximize district funding with built-in state and federal reporting functionality as part of the core student information system (SIS).

Included In
DE

Survey

Campus Survey delivers the tools needed to create and deliver online questionnaires for immediate feedback. Quickly capture information for clarity in decision making, receive continuous feedback and research possible outcomes.

Included In
DE

Transportation

Track transportation and parking information for each student. Accessible data eliminates questions from parents and staff as to where students are supposed to be before and after the school bell.

Included In
DE

Optional Premium Products

Campus Premium Products work seamlessly with the Campus SIS so you can eliminate third-party systems. Send emergency notifications, achieve faster lunch lines, lower costs and increase efficiencies.

Messenger with Voice

Campus Messenger simplifies communications to staff, students and parents through an easy-to-use Web interface. Deliver regular, content-rich communications via email, phone or text messaging. Use system data to immediately distribute a large volume of calls including emergency notifications with Campus Messenger with Voice, powered by ShoutPoint VOIP service.

Data Health Check

Detect costly data entry errors with a Campus Data Health Check. Data entry integrity is especially important with Infinite Campus as data is entered once and used by many across the district to improve student achievement, submit state required reports, and parental communications. No matter the size of your district, a Campus Data Health Check can improve data accuracy to save time and money.

Continuous Backup

Campus Continuous Backup is a powerful way to retrieve almost 100 percent of your data after a disaster. As data is being saved, it is replicated to the Infinite Campus headquarters on a continuous basis. Should the unthinkable occur, rest easy knowing that your data will be available, district-wide, with minimal data loss (20 minutes or less) in about one hour.

Data Analysis & Visualization

Complete Solution for Data-Driven Decision Making

Reporting requirements are increasing and your need for data insights has never been more important. Campus Data Visualization provides an easy-to-use interactive tool for data monitoring and analysis of student data. Real-time, accurate data provides the confidence to make the right decisions for your district.

**Additional
Cost**

Premium Product

Campus Data Visualization offers insights into essential questions at the district, building and classroom levels. View the correlation between assessment scores and classroom grades to determine what factors impact student learning, such as teacher performance. Drill down to identify the students that are just above or below the goal category line to provide them with the support they need.

View District vs. State results by Year alongside results by School by Year. Select or deselect checkboxes to change the visual representation on the fly without the need to return to the data source. Data mining can help identify unanticipated issues. Use pre-defined reports or a custom report design tool – either way, Campus Data Visualization gives you the ability to make rapid and accurate decisions that impact students' educational paths.

Access

Our integrated interface is your gateway to powerful reports created by our team of educators. The single point of entry allows you to view reports that draw from multiple district data sources, such as student information, finance and human resources.

Resolve

Key performance indicators within your data can identify patterns and relationships to answer specific questions. The pre-defined templates allow you to quickly and easily glean insight from your data.

Discover

Drill-down your reports to mine and uncover patterns that will reveal areas for district or classroom improvements. With the click of a mouse, analyze across multiple dimensions, such as grade, classroom or demographics to make data relationships evident.

Get the answers you need on demand and in real time!
