

Dover School District COVID-19 Survey

Start of Block: Block 8

Consent The Dover School District is in the process of planning for the 2020-2021 school year. The COVID-19 pandemic has added many challenges to the planning process that takes place throughout the summer months. This survey takes approximately 5-10 minutes to complete and is completely voluntary. Your participation will provide the District with your insight into the remote learning held this past spring, as well as your thoughts on the start of school in the fall.

Data collected from the survey, along with results from the adult and student focus groups, and guidance from the state, which is projected to be made available in mid-July, will guide the School Board and Leadership Team as planning continues for the 2020-2021 school year. This survey is open and will remain open through the end of the day on Friday, July 10. Personally identifying information such as your name and IP address will not be collected. You will be asked for basic demographic information but may chose not to answer. Thank you for your time and assistance as we plan for the fall and the 2020-2021 school year. If you have any further questions, you can contact me at the address below.

RankedChoice The district is considering several options for instruction for the fall. The final option will depend on guidance from the State Board of Education, as well as district needs and capabilities.

"100% virtual learning" would mean that students would be learning from home.

"100% in-person learning" would mean that students would return to instruction in the school buildings.

"A hybrid of virtual and in-person learning" covers a range of potential scenarios where students would spend part of the time at home and part of the time in the school buildings.

Please rank your preferences for school instruction in the fall, with 1 being your most preferred option, and 3, your least.

_____ 100% virtual learning (1)

_____ 100% in-person learning (2)

_____ A hybrid of virtual and in-person learning (3)
