| HEALTH RISKS  | Pros | Improved mental health, and lower risk of isolation.                                                                                                                                                                                                                                                                                                                                           | Reduced risk of virus transmission.                                                                                                                                                                                                                                                                                                                      | Least risk of virus transmission.                                                                                                                                                         |
|               | Cons | <p>Highest risk of virus transmission.</p> <p>Uncertainty in sustaining model due to known and unknown staff and student medical needs.</p> <p>Most risk for staff and students, particularly those who have medical concerns.</p> <p>More risk for staff and students who engage with a large number of people each day, (i.e. secondary level, related arts, support service providers.)</p> | <p>Uncertainty in sustaining model due to known and unknown staff and student medical needs.</p> <p>Increased risk for staff and students, particularly those who have medical concerns.</p> <p>More risk for staff and students who engage with a large number of people each day, (i.e. secondary level, related arts, support service providers.)</p> | <p>Mental health risks.</p> <p>Risk of Isolation from peers.</p>                                                                                                                          |
| ACCESSIBILITY | Pros | <p>Students have equitable access to education.</p> <p>Devices, platforms, and programs procured by the District to support digital learning that can be used in any model.</p>                                                                                                                                                                                                                | <p>Students may have the opportunity for face-to-face instruction for some days.</p> <p>Devices, platforms, and programs procured by the District to support digital learning that can be used in any model.</p>                                                                                                                                         | <p>Consistent schedule, expectations, and accountability.</p> <p>Devices, platforms, and programs procured by the District to support digital learning that can be used in any model.</p> |
|               | Cons | <p>Uncertainty in sustaining model due to known and unknown staff and student medical needs.</p> <p>Most risk for staff and students, particularly those who have medical concerns.</p> <p>More risk for staff and students who engage with a large number of people each day, (i.e. secondary level, related arts, support service providers.)</p>                                            | <p>Uncertainty in sustaining model due to known and unknown staff and student medical needs.</p> <p>Increased risk for staff and students, particularly those who have medical concerns.</p> <p>More risk for staff and students who engage with a large number of people each day, (i.e. secondary level, related arts, support service providers.)</p> | <p>Mental health risks.</p> <p>Risk of Isolation from peers.</p>                                                                                                                          |

|                  |      |                                                                                                                   |                                                                                                                                                                                                                                           |                                                                                                                                                                 |
|------------------|------|-------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| INSTRUCTION      | Pros | Continuous, face-to-face instruction.                                                                             | K-4 literacy and math instruction prioritized during in-person instruction.<br><br>For students in-person, face-to-face instruction is prioritized.<br><br>During virtual learning, asynchronous and synchronous opportunities available. | Continuous, uninterrupted virtual instruction.<br><br>During virtual learning, asynchronous and synchronous opportunities available.                            |
|                  | Cons | Depending on safety protocols, instruction may be impacted.                                                       | Some K-4 literacy and math prioritized during in-person, which will result in an interrupted instructional balance at the elementary level.                                                                                               | May be a learning curve for students, family and staff with devices, platforms and/or programs.<br><br>Families of younger students need to be highly involved. |
| STUDENT SUPPORTS | Pros | Student support services available in person.                                                                     | Student support services may be available in person or virtually.                                                                                                                                                                         | Student support services will be available virtually.                                                                                                           |
|                  | Cons | More risk for staff and students.                                                                                 | Some risk for staff and students.                                                                                                                                                                                                         | No risk for staff and students.                                                                                                                                 |
| SOCIALIZATION    | Pros | Students will be able to socialize with restrictions.<br><br>Current safety guidelines will require restrictions. | Some limited access to peers for socialization.                                                                                                                                                                                           | Virtual opportunities for social interaction.                                                                                                                   |
|                  | Cons | Socialization is dependent upon safety protocols in place.                                                        | Limited access to peers, socialization is dependent upon safety protocols.                                                                                                                                                                | Access to peers is significantly reduced.                                                                                                                       |

|           |      |                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                   |                                                                                                               |
